

I have been a resident in the Hi Desert Area for approx. the last 2 years and Air 1 has been an integral part of my life since I found it on the radio. For a long time I had been discouraged with other music programs because of the nature of music they transmit. Air 1 is a vital part of my day as they play uplifting music, clean music. This is important because I work with children and it is imperative that I am aware of what they are hearing while in my presence. They give out encouraging messages and have programs where enlightening topics are addressed and discussed. They truly have a positive effect in my local community as I know many of the children in the community look to them as a positive alternative regarding music. It would be tragic if Air 1 was displaced from our community. Where else would children and adults who enjoy listening to Christian pop/alternative music turn to? I know of no other station that does what they do. In this day and age children as well as many adults feel discouraged at times and Air 1 really helps in strengthening our faith and commitment to our beliefs. For this reason I feel the services they offer, the music they play and the programs they air are of public interest to our community.
